

Intrievex Overview

Now finding information is easy

The Intrievex logo features the word "intrievex" in a lowercase, sans-serif font. The "i" is blue, and the "ntrievex" is dark blue. A light blue wave graphic is positioned above the letters "i" and "n".

Who we are

Intrievex is an information retrieval technology and services company. We make the science of document and information retrieval simple, reliable and more valuable to you and your business.

We provide information retrieval tools and services like our new intelligently disruptive CourtsOnline.com, to industries including legal, title, real estate and medical. Our proprietary and unique technology is easy to use, secure and the most cost effective. Headquartered in the technology corridor of Redmond, WA, Intrievex attracts the country's sharpest entrepreneurial engineers and leaders. Facts and data don't lie. Let us retrieve the truth for your business.

We're Intrievex – A better way to find information.

How we do it:

We provide information retrieval tools and services over the web, through data feeds and database backfills to industries including legal, title, real estate, and medical. Our proprietary technology is simple and secure and we support your business needs with flexibility and responsiveness.

We make finding information simple through a better search experience, advanced features and a welcoming and modern user experience. Our data can be delivered in various methods and formats to suit the customer's needs.

What we do:

Our new flagship application – CourtsOnline.com – is a proprietary technology that provides a better search experience using the web 2.0 to access, search, and retrieve court case records.

Users can use the web platform to perform searching for all cases associated with a specific person or business in one or more courts. In addition, it allows you to search for a particular case number in a specific court.

Access is available 24 hours a day, 365 days a year, making court records research possible when needed, rather than just during business hours.

Why we do what we do

We believe there's a better way to find information and we think finding information should be simple. We keep these guiding principles as our compass in delivering services and solutions to our customers.

Cost Reduction

- Realize operational cost savings through operational integration of data.
- Offer the most inexpensive solutions in the market.

Customer Focus

- Think long term and customer relationships are key.
- Be great partners who value customers success.

Robust Data

- Offer customized, robust data solutions.
- Offer multiple geographies.
- Offer national bankruptcy coverage.
- Data should be fresh and reliable.
- Develop a growing national footprint.

Technology

- Automation of electronic uploads eliminate data entry.
- Develop tools that are easy to use.

User Friendliness

- Provide a better search experience with richer results.
- Offer premium support.

What we do

CourtsOnline

Our new flagship application – CourtsOnline.com – is a proprietary technology that provides a better search experience using the web 2.0 to access, search, and retrieve court case records.

Users can use the web platform to perform searching for all cases associated with a specific person or business in one or more courts. In addition, it allows you to search for a particular case number in a specific court. Access is available 24 hours a day, 365 days a year, making court records research possible when needed, rather than just during business hours.

Daily Data Feeds

We provide daily data feeds for most industries that are dependent on data sources, such as legal, title, real estate, and medical. One of our most active sectors is the title industry where real estate title plants produce information to support reports for production operations in title companies.

Our daily data feeds service provides customers with data by case type and by court, filed for a specific day or any time period. Feeds can be provided in virtually any format or data type that is compatible with a client's upload utility. This allows you to keep your databases up-to-date with the constantly changing data in your industry.

Data Records Backfill

Our data records backfill service is the sister service to our daily data feeds. Our software is highly-flexible and capable of working in almost any industry with any type of data set.

As we prepare to get you up and running on daily data feeds, we also look historically to sweep the data and backfill your databases as far back as you need. You pick the date range and data set, and we do the work. These one-time bulk data backfills are a great way to make your information current and more robust.

Web Docket Viewer

The Web Docket Viewer can be integrated into any web based software platform. Within the Title industry, the Web Docket is integrated into your title plant software allowing you to view a court case record docket right in the interface. This gives you a seamless integration of data and software, all in one system.

What Customers Are Saying

"We use CourtsOnline for a variety of things including checking the status of pending orders, obtaining copies of missing pleadings, and obtaining background information and documents for new matters. This is especially helpful when preparing new business reports. For all of these tasks, CourtsOnline provides a very useful and convenient service."

Mitch Livingston,
Director of Operations, Bishop,
White, Marshall & Weibel, P.S.

"We have been using data services from Intrievex for the past several years. Based upon the integrity of the data, exceptional service, and demonstrated expertise, I would heartily recommend Intrievex data systems without hesitation. We have been thoroughly satisfied since the induction of the system into our title operation and rely on the information it provides for us daily."

Erik Bauer,
Data Administration Manager,
Property Insight

"We have been working with Intrievex to utilize their historical data as well as their daily data feeds. We have been quite pleased with the quality of the data as well as the customer support and service. They have a great team in place and solid data."

Craig Muldoon,
Vice President of Market Development,
